

5.5[★]

NABERS

ENERGY

This certifies that

Achieved 5.5 - star NABERS Energy Base
Building Rating for

This rating is valid until

NABERS Energy Rating Report

This report provides more information about your NABERS Energy Rating and greenhouse gas emissions. It explains how the data for your NABERS Energy Rating can be used to meet mandatory and voluntary reporting requirements.

These NABERS Energy Rating details are for

Rating number

Valid until

Rating period

NABERS Energy Rating

Rating progress metric¹

Building Type	Office
Rating scope	Base Building
Rated area	
Rated hours	
Rated electricity	
Rated gas and LPG	
Rated diesel	

¹ The rating progress metric indicates where a rating sits between a whole or half-star increment.

■ Diesel ■ Gas ■ Other voluntary purchases ■ RET/State targets

	Quantity	% of total site energy
Renewable electricity		
Onsite renewable electricity		
RET ¹ and State/Territory targets		
GreenPower		
Other voluntary purchases ²		
Total renewable electricity		
Non-renewable energy		
Non-renewable electricity		
Gas and LPG		
Diesel		

Your NABERS Energy Rating is 5.5 stars and your greenhouse gas emissions³ are

1

	With renewable electricity ⁴	Without renewable electricity ⁵
Total greenhouse gas emissions (scope 1 & 2)		)
Total greenhouse gas emissions (full fuel cycle - scope 1, 2 & 3)		)
Greenhouse gas intensity (scope 1 & 2)		)
Greenhouse gas intensity (full fuel cycle - scope 1, 2 & 3)		)

Energy intensity

6

¹ RET stands for Renewable Energy Target.

² Includes voluntarily surrendered LGCs from both electricity generated offsite, and from electricity generated onsite that is exported to the grid.

³ Greenhouse gas emissions for this rating have been calculated applying emissions factors from the NGA factor 2024 edition.

⁴ Emissions with renewable electricity are calculated using the market based electricity accounting method, with a residual mix factor.

⁵ Emissions without renewable electricity are calculated using the location based electricity accounting method.

How to use your NABERS Energy rating details

The table below explains how you can use the data in this report for mandatory and voluntary reporting requirements. For each reporting requirement, use the number(s) in the right column to identify the correct data to be used from this report.

Mandatory scheme and reporting	
To report under the National Greenhouse Emissions Reporting (NGER) scheme	6
Mandatory for constitutional corporations that meet a reporting threshold for either greenhouse gas emissions, energy use or production for a reporting (financial) year. You can only use the greenhouse gas emissions information from NABERS for reporting under the NGER scheme if the data for your rating was collected between July 1st and June 30th. For more information about NGER, see www.cleanenergyregulator.gov.au	2
For compliance with the Commercial Building Disclosure (CBD) program	1
Mandatory for constitutional corporations that are sellers or lessors of office space of 1,000 m2 or more at the point of sale or lease. For more information about the CBD program, see www.cbd.gov.au	
Voluntary scheme and reporting	
For corporate annual reporting of energy of use and carbon footprint	6 5
Organisations are encouraged to report their energy use and full life cycle greenhouse gas emissions (scope 1, 2 & 3) in their annual report to capture a more comprehensive picture of emissions attributed to its activities.	
For National Carbon Offset Standard	5
This is a voluntary standard for businesses to use in becoming carbon neutral or developing carbon neutral products. For more information about the NCOS program, see www.climatechange.gov.au	
For Climate Bonds reporting	5
To qualify for a Climate Bond for Low Carbon Green Buildings, assets are required to demonstrate very low carbon emissions in operation for the life of the bond. Specifically, these buildings must have a carbon intensity (kgCO ₂ -e/m ²) in the lowest 15% of the local market. The Greenhouse gas intensity (kgCO ₂ -e/m ²) (without GreenPower) calculated in a NABERS rating can be used for reporting during the term of the bond. For more information, see www.climatebonds.net

NABERS

WATER

This certifies that

Achieved 4.0 - star NABERS Water Base Building Rating for

This rating is valid until

NABERS Water Rating Report

This report provides more information about your NABERS Water Rating and water consumption. It explains how the data for your NABERS Water Rating can be used to meet mandatory and voluntary reporting requirements.

These NABERS Water Rating details are for

Rating number

Valid until

Rating period

NABERS Water Rating

Building Type	Office
Rating scope	Base Building
Rated area	
Rated hours	
Rated water	

Rating progress metric¹

Your NABERS Water Rating is 4.0 stars and your water consumption is

Total water consumption

Water intensity

Normalised water consumption

¹ The rating progress metric indicates where a rating sits between a whole or half-star increment.
